

Olivia Hamilton:

Work Experience

Sunnybrook Health Sciences Centre

As part of the hospitality and retail team, I brought patients to and from various appointments by wheelchair. I helped people with directions and greeted people as they arrived at the hospital.

Swift Medical

I packaged a Class I Biomedical Device in accordance with Health Canada Guidelines. I also participated in company-wide compliance training.

Hollywood Gelato

I worked as a cashier, server, and barista. I helped with inventory, assisted customers, and recommended gelato products.

White House Meats

At White House Meats, I worked as a cashier, assisted with inventory management, and cut and prepared meats. Further, I helped customers find what they needed, recommended novel products to them, and took orders and coordinated deliveries.

Other

McMaster Science Society (MSS) Sciclones

During the summer of 2019, I represented the Faculty of Science during McMaster's Welcome Week, May @ Mac preview, and two fall previews to welcome first-years to McMaster University.

MSS Mentorship Program

I am a mentor to first-year mentees who are under the Faculty of Science at McMaster University. I help them transition into their first year of university with ease. I lead biweekly meetings to discuss ways they can improve their overall well being and academic performance.
